EDUCATION

Algonquin College | Graduate Certificate, Business Intelligence System Infrastructure (3.9/4.0) Ottawa, ON Jan 2026 - Present

Algonquin College | Advanced Diploma, Computer Engineering Technology Ottawa, ON Jan 2019 - Dec 2022

PROGRAM-RELATED SKILLS

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, scikit-learn, Matplotlib, Data Pre-processing, Data Modelling
- **Business Intelligence & Visualization:** Power BI, Tableau, Excel
- **Web & Software Development:** Django, C#, JavaScript, HTML5, CSS, Java, C/C++, streamlit
- **Database & Cloud Technologies:** SQL Server, Azure SQL, AWS Cloud Fundamentals, Data Management
- **Tools & Platforms:** GitHub, Microsoft Office Suite, WordPress, Claude
- **Core Strengths:** Data Analysis, Dashboard Development, Machine Learning, Problem Solving, Team Collaboration, Communication, Risk Analytics

ACADEMIC PROJECTS

Hospital Operations Dashboard | Algonquin College Ottawa, ON Mar 2026 - Apr 2026

- Designed a normalized 11-table SQL Server relational database with enforced primary and foreign keys and integrity constraints preventing duplicate and inconsistent records at the source.
- Translated business requirements into reporting specifications, measurable KPIs, and documented data schemas, working with a project team to align technical output to stakeholder needs.
- Authored and validated 15 business reporting queries to confirm accuracy before release; presented the findings through a role-based Power BI dashboard built on the curated dataset.

Airport Operations – Power BI | Algonquin College Ottawa, ON Mar 2026 - Apr 2026

- Pre-processed and managed large operational datasets in Excel before developing an interactive Power BI dashboard to analyze airport KPIs, including delays, cancellations, and on-time performance across configurable routes and time periods.
- Engineered KPI cards, time-series trend charts, and an interactive map visualization of flight routes – giving airport authorities a single-pane operational view with drill-through by source, destination, and time period – reducing operational review time by ~40%.

Predicting Collision, Machine Learning | Algonquin College Ottawa, ON Mar 2026 - Apr 2026

- Conducted exploratory data analysis in Python (Pandas, NumPy, Matplotlib) to uncover patterns and trends in over 10,000 KSI crash records before building the ML pipeline.
- Applied data preprocessing, feature engineering, and SMOTE resampling techniques to address severe class imbalance while preventing data leakage.
- Trained and evaluated Logistic Regression, Random Forest, and Decision Tree models using ROC-AUC, precision, recall, and F1-score metrics.
- Visualized model input features and evaluation results using matplotlib and seaborn charts, then summarized insights in a report to guide risk mitigation strategies.
- Validated data quality and conducted comparative model analysis to identify the most robust predictive solution, optimizing model performance metrics.

SmartSpend Personal Finance | Algonquin College Ottawa, ON Mar 2026 - Apr 2026

- Analyzed a 3,000-record personal finance dataset from Kaggle using Python and Pandas to evaluate user spending behaviour and 50/30/20 budget compliance.
- Visualized spending trends and budget insights using Matplotlib and Seaborn, producing 10+ charts including heatmaps, pie charts, and time-series plots.
- Built a full-stack web application with Django featuring income/expense tracking, real-time compliance alerts, and an interactive spending dashboard.

WORK EXPERIENCE

Edo Japan Restaurant, Ottawa, ON

Supervisor

Apr 2025 - Jun 2025 & Jan 2022 - Sep 2024

- Supervised daily operations and a team of staff during high-volume periods to ensure 100% quality standards.
- Processed 200+ orders daily using the POS system, maintaining high accuracy in transaction data.
- Leveraged Excel for data management to manage inventory levels, analyze usage trends, and coordinate with suppliers to eliminate out-of-stock scenarios.
- Trained new staff, handled customer inquiries, and resolved complaints, earning high ratings in monthly mystery shopper evaluations.

VOLUNTEER EXPERIENCE

Innolink Capital Ltd, Calgary, AB

Web Designer & Marketing Assistant (Intern)

Nov 2024 - Mar 2025

- Conducted online research to identify relevant platforms, pages, and content opportunities for marketing campaigns.
- Executed digital marketing campaigns with strict attention to detail, consistently meeting fast turnaround deadlines.
- Scheduled and monitored social media campaigns using Meta Business Suite, tracking engagement and audience insights.
- Assisted in WordPress website updates and SEO optimization to improve online visibility.
